

2023 Proposed Spray Treatments for Spongy Moth (*Lymantria dispar* or gypsy moth)

Name of area: IL_WAYNE_WCHICAGO_1_MD

Acres to be sprayed: 1,580 15g active ingredient

For more information: www.SlowTheSpread.org or contact Illinois Dept of Agriculture:
Nancy Johnson, program manager Nancy.Johnson@Illinois.gov phone # 815.347.0401

Illinois Department of Agriculture in cooperation with the US Forest Service's Slow the Spread Program have proposed treatment areas for spraying to control the Spongy Moth. Depending on weather, Splat GM-Organic Mating Disruptor, will be sprayed from yellow air tractors late June

SPLAT GM-O is an organic, biodegradable formulation for the control of *L. dispar* using mating disruption. It is made entirely of food grade materials and has the consistency of hand cream. SPLAT GM-O uses pheromone, an effective and safe method to control *L. dispar* moth without impacting other insects, mammals or the surrounding environment.

Purple outline is area to be sprayed. Blue outline is flight area. Yellow airplanes will be flying low in this area
